

Glyphosate Petition

Person	Organisation	Country	Comment
Mariam Mayet	African Centre for Biodiversity	South Africa	The time is long overdue to shift to socio agro ecological farming and food systems. A good start is to ban glyphosate now.
haidee swanby		South Africa	we can't keep loading our environment with chemicals and continuing with industrial monocropping, we have to transform the way we produce food
Gareth Jones	ACB	South Africa	
Naseema		South Africa	We want back natural foods and not rubbish that's poisoning us!
Tanya Kerksen		United States	I will not accept glyphosate to be passed in South Africa, it should be banned
Inge		South Africa	altogether!
Kim Cools	Informationclinic	South Africa	Organics only
Moira Tuck	Self employed	Südafrika	
Jane Cherry	COPAC	South Africa	
Ingrid Blank		South Africa	effect in addition to banning the cultivation of GMOs which contaminate our environment and food chain, posing an immense health risk for animals and humans alike.
Jim Bergoff		South Africa	I object to eating food that contains poison.
Jeremy David Acton	Dagga Party of South africa	South Africa	Glyphosate was known to be cancer causing and monsanto covered it up. They sprayed people and Cannabis and food crops and livestock in the Transkei. This is chemical warfare and a crime against humanity and Nature. I say #MonsantoMustFall !!
Jane Ralls			
Beverley marshall	Private	South Africa	
Margaret Candy	Nkuzi Development	South Africa	Never mind the 'possibly carcinogenic to humans', that about the rest of the food chain, the birds and the bees. Bees are so vitally important and EVERYTHING must be done to ensure their survival.
Brand Nthako	Association	South Africa (Azania)	GlyphosateMustFall
Alan Rosenberg	Consultants	RSA	
Amelia			
CLIFFORD ROSEN	Let it grow foundation	South Africa	
Davine Cloete	SAFSC	South Africa	Stop poisoning us.We want agro-ecology to be recognise
Sarah Dekker	SAFCEI	South Africa	
Dr E L Galgut	Private	South Africa	
Frank Molteno	One Web of Life, SAFCEI	South Africa	It is sacrilege to poison the Earth, our fellow beings and ourselves
Emma Kelly	Earthdance	South Africa	
linzi			

Glyphosate Petition

Esther Boshoff		RSA	
Jean-Pierre Le Roux		South Africa	
JO Villet			
Melissa Jacobs		South Africa	
Lauren Barwick		South Africa	
leane	pvt	South Africa	
Liz du Plessis	Private	South Africa	
monique rosen	na	south africa	
Bridgitte Potton			There is absolutely no positive benefit in adding poison to your food or to the environment you live in.
Janet Gracie	The Green Co	South Africa	
Louise van der Merwe	Compassion in World Farming (SA)	South Africa	Frogs are dying by the thousands in the Suurbraak area of the Western Cape following contamination by Glyphosate spraying by a single farmer up-river.
Nicola Enstrom		South africa	
Laina Botha		South Africa	This dangerous substance must be banned!
Tanjaail		South Africa	the spraying the police are doing in an attempt to curb cannabis growers, they are damaging our country, our fauna & flora and our own people by poisoning the landscape.
kris	Weleda Pharmacy	South Africa	
Anne Christine Howard		South Africa	
Charleen		South Africa	I have noticed a massive change in my children since going organic. Please we need to stop this pesticides and GMO. It's killing our children!!!
Geoffrey Tracey	Private	South Africa	
Salim Ebrhaim	none	South Africa	Stop allowing people before profits! Food Sovereignty now.
Ra'ees	none	South Africa	Please stop corporate colonisation of our food systems!!
Liz Davis	safsc	south africa	
Ulandi du Toit			This affects us all. Glyphosate is poison!
chivonne janse van vuuren		south africa	
Alexis		South Africa	
Chantelle		South Africa	
Rachel Serakwana	ACB	South Africa	
Catherine Gamaroff	none	South Africa	The science can no longer be denied
Caroline Richmond		South Africa	Get rid of the greedy corporates and their evil agents - ban glyphosate immediately and lets chase Monsatan, Dow, Syngenta and ALL the evil corporations out of our lives, simple do not support their evil empires
jeanne-marie loveday			

Glyphosate Petition

Ross		SouthAfrica	
Christine			
Kevin Breed		Canada	
Tracy Henry			Allowing the use of glyphosate is sure to send the national health system into overdrive (and overspend) - it is carcinogenic and our healthcare system is not equipped to deal with the results of our exposure to it.
Heather Walker	self	South Africa	
Pia Joynt	Private	South Africa	
Larry Halvey-Goodwin	PLANT (Partners for the Land & Agriculture Education)	United States	The quest for personal & corporate profit cannot trump human & environmental health. It is a terribly immoral trade-off.
Kent Cooper	Pennsylvania	South Africa	
Grant Rahme	Private citizen, Nutrition	South Africa	Living in a wheat growing area of the Western Cape, I have had terrible asthmatic reactions to glyphosate drift. Please remove this toxic chemical from our food growing system altogether.
Christie Hewlett	Private citizen, and Vi	South Africa	
Charl Crous		South Africa	Soil is life.
Shannon Harvey			
Brenda Wegerle	Private	South Africa	I have had my suspicions for many years now that the number of cancer cases in our farming communities are Glyphosate related.
Keren moss			
Leanne Scott		South Africa	
Andre	Home	South Africa	
Gordon james	Vegansa	South africa	
Karla Mabeta	Mabelentombi Resource Centre	South Africa	Rural Farmers are not being told what they are planting and the consequences of planting GM Maize provided through subsidies by our elected government. As a concerned citizen, a voter, an educator and a farmer I demand that all citizens in South Africa be told the truth so they can make an informed choice!
Reyhana		South Africa	As a pharmacist I am concerned about the increase in the number of people diagnosed with cancer. We don't need carcinogenic toxins in our food chain.
ahmad	citizen of ZA	South Africa	Maize is still a staple in SA. History will record that the greedy Commercial Farmers and the government was responsible for the (health) suffering of a sizeable preporition of the citizens (like asbestosis)
Patricia Shaw			
Bridget Harrer		South Africa	Its common knowledge amongst educated people how dangerous glyphosate is to humans, animals and the general ecosystem. It's a crime to allow this product into South Africa. These big corporations have to learn where their boundaries lie!
Karen Read		South Africa	

Glyphosate Petition

Elizabeth Bravo	RALLT	Ecuador	
Jayne		South Africa	
Chris Grobbelaar	Private	South Africa	The poison is killing the organic content of the soil. It's undermining our ways of
Nobuntu Mazeka	Sustaining Wild Coast	South Africa	livelihood.
Philip L Bereano	Washington Biotechnology Action Council	USA	
Vishwas Satgar	COPAC/WITS	South Africa	No to poison in our food system. The government must prove it is healthy. Show us the science! Unless this is done ban it!
Alison Hearfield		South Africa	
Melissa de Billot		South Africa	
Aden Hinds	Hinds Brothers Band	South Africa	
Thomas	Wits	South Africa	Let's put an end to ecological imperialism!
Marjan Houpt	Mevrouw	Nederland	
Magdalene Seguin	CANSA	South Africa	
Nikki Van Reenen	Nikki Van Reenen	South Africa	
			It's so vital for a change in the agricultural sphere. If there was an uprising about education, once people are conscious about what's so wrong about the food system, best believe another uprising will follow. To avoid a downfall, hearing the cry for safer foods is necessary.
Chantè Ramiah	university of Cape Town	South Africa	
Jerome Aaron		South Africa	
Bronwen Oosthuizen	Private	South Africa	
Cristiana Da Costa		south africa	
Megan kruger	Studios	South Africa	
Simone		South Africa	Please, for the health of our nation find alternative ways of growing food without chemicals and toxic substances. Natures model is best.
CF MARAIS		South Africa	
Elreta Burger		South Africa	Stop poisoning our food and not giving us a choice.
Margaretha Savage	NO GMO South Africa	South Africa	The glyphosate from the farms around us are causing my family and I to suffer from Gluten intolerance and we have to smell the poison often. All the Glyphosate is preventing children who eat Maize porridge from absorbing enough nutrients to learn
Hayley O'Dell		South Africa	
Brady Kelly	Mopani Farmers	South Africa	I am really more just a concerned citizen of Earth.
Adam Mabunda	Association	South Africa	I truly am anti-chemicals in our food system, case closed.
Salome Smith		South Africa

susan	none	usa	
Marissa			
Hendrik Mentz	Individual	South Africa	Thank you for taking this on on our behalves.
			Genetically engineered crops have locked farmers into an ever-increasing need for the wide-spread spraying of glyphosate. Now, as the failure of these systems are becoming evident we are seeing the emergence of herbicide-resistant 'superweeds' and calls by agribusiness to add post-harvest spraying of dangerous chemicals such as paraquat. (http://www.no-tillfarmer.com/articles/5030-post-harvest-herbicides-control-glyphosate-resistant-palmer-amaranth). How long will we continue to walk this chemically-dependent path before admitting that healthy, sustainable, and organic solutions are viable, available, and essential to our well-being?
Kristof Nordin	Never Ending Food	Malawi	
Janet westerhof			
Peter Johnson	Private Individual	South Africa	

Glyphosate Petition

			correlation between the increased use of glyphosates and the increase in cancers and coeliac disease. This has affected my loved ones directly, I have a parent and a friend in remission , and an ex-wife who passed away after chemotherapy at the age of 48. She was a farmer. I believe that the producers of glyphosates have concealed the evidence of their health effects as the same corporate interests also benefit from sick consumers through the sale of pharmaceutical products and medical treatments. I believe that this issue is such a serious threat to people and the planet that if mass civil disobedience is required to end its use and drive corporations from power then we should not hesitate to do that.

Kris Marais	Observatory SRA	South Africa	To be accurate I am a very concerned citizen of the world - brother, friend, father, lover, poet, worker, volunteer etc. One plac where I work is in a deciduous growing area - right now I can see three tractors spraying in the orchards- God know's what? Its incessant during the growing period and has been for more than 100 years. The tractor drivers arent wearing masks or protective goggles etc
Talitha Gamaroff		South Africa	
Craig Shackleton			
Lydia fox		south africa	And a concerned consumer
herschelle milford			
Jeunesse		South Africa	
Kathy Brookes		South Africa	RoundUp is sold in nurseries to members of the public! I therefore don't know if my neighbours are using it. I believe it is getting into our water and there is no way to remove it from the water. RoundUp and other herbicides are used in schools where children are exposed to it. We do not know how much we are exposed to and the more weeds become resistant to Glyphosate, the more Monsanto and their ilk will have to use stronger chemicals in their herbicides. The effect on people, animals and the environment will become worse. All herbicides must be banned.
Lynne Brown	private	South Africa	People have the rights to the natural resources they need for survival and decent life. At most basic level, this includes the right to have access to land , food , water and air . for these to be unspoiled and free of pollution. Also to have a right to live in a world in which the environment and everything in it are respected and protected. And stop these toxic chemicals to be used in our food, we're not the experiment of Monsanto.
Zim Keye	Soldarity economy movement & South african food sovereignty & Ma	South africa	

Glyphosate Petition

			proven themselves unethical, reckless, irresponsible and sociopathic in their behaviour. So I very much doubt that their products can be trusted even if there wasn't evidence of pollution, which there is. Companies like Monsanto make poison, that's just what they do. Small farmers are more than capable of handling the food supply, so nobody needs these chemicals, it is just profit at the expense of human health - plain and simple.

Tami Canal	March Against Monsanto	United States	I believe numerous studies on the harm glyphosate causes as well as the fact that it's manufacturer, Monsanto, has covered up the link the chemical has to cancer for the better part of three decades more than warrants an immediate ban on glyphosate until toxicity can be properly understood and researched.
MargiePretorius	Sustaining the Wild Coast	South Africa	
Alice Thomson	Earthlife Africa Durban	South Africa	We need to promote agro-ecology - better for the soil, sequesters CO2, helps adapt to climate change, produces more food per acre, less inputs, more biodiversity, costs less, employs more people.

Lynn Stokes			
Brigitte		Canada	Glyphosate use and GMO's need to come to an end, totally incompatible with sustainability, impossible to assure an acceptable future for future generations if we don't eliminate these terrible agricultural practices. Organic is the only answer, let's trust nature, it's been there long enough to know what's best!

Glyphosate Petition

			I fully support this initiative to ban the chemical use by the commercial/corporate farmers in this country because they are destroying the environment and poisoning South African population in the name of profit. We are being misled by big corporates into believing that the foods produced in this country are healthy. Thank you for the good work you are doing to educate ordinary South Africans together with other organisations championing smallholder food production systems based on agro-ecological and food sovereignty principle elsewhere in the continent and the world at large. Thank you.

			the gut is now unrefutable that anyone eating glyphosate contaminated food will have health issues as a result. The question is whether these health issues are small (ie: gut problems, IBS, constipation), or serious (ie Alzheimers, Parkinsons, MS, cancer). You do the maths. No one is exempt when eating foods that have this toxin on or in them. If you eat bread - you are eating glyphosate as it binds to gluten.

			We need a truly independent review panel. Over the last 50 to 60 years we have done more to destroy our food quality and safety-as well as environmental damage- than in the whole of the history of humankind. This is all for the sake of a few corporations and their profits who continue to mislead us in food production and energy just to name two. It is also the corporate colonisation of Africa. This blip in the screen of human development needs to be turned around now so that good (ethical) science works for the common good with common sense.

Alana Nangle		United States	Superb blog! Do you have any helpful hints for aspiring writers? I'm planning to start my own site soon but I'm a little lost on everything. Would you suggest starting with a free platform like Wordpress or go for a paid option? There are so many options out there that I'm totally confused .. Any tips? Thanks a lot!
Kathinka van Eeden		South Africa	
Jelena Dokmanovic		South Africa	
Kathryn		SA	
Michele		South africa	residential area, could use bio, eco friendly, organic sprays on the vines as many are suffering from allergies and illness due to having to inhale the spray that drifts across Constantia.

Glyphosate Petition

			Constantia to inhale/ingest...is completely shocking to me! How can it actually be allowed. Why are they not growing the vines organically? Besides the fact that they are destroying the top soil and polluting our ground water and streams with pesticides... and the air that we and our children are breathing. We must be an insane society that we allow this to happen around us.
Jack		South africa	
Caron Tomblin	SEED	South Africa	
Azucena Cushing		Germany	Write more, thats all I have to say. Literally, it seems as though you relied on the video to make your point. 			There is overwhelming evidence that below-minimum dose glyphosate-based herbicides cause cancer, bind to soil particles and leach into water supplies. Once in water supply they cause abnormal growth in reptiles, amphibians and fish. In the soil they kill off other plants and all beneficial soil microbes. Soil is left dead and barren, and the overuse of chemical pesticides, herbicides and fertilisers creates desert as the unreplenished topsoil is blown away. Human, bovine, equine and other mammal babies are born malformed through glyphosate poisoning, and premature aging also occurs. All these facts can be easily found in scientific studies and reports.
Lynda Jones	Intelligent Verbatim	South Africa

			I am so tired of greedy poison manufacturers constantly refuting allegations of harm to humans and animals caused by their products for the sake of profit. We are talking about lives here - wake up people. There are safe and effective natural remedies for plants - what do you think our ancestors used? Certainly not Roundup! We all need to get back into tune with Mother Nature and work with our eco-systems, not against them. Every single insect serves a purpose and has a place - and the only time the system becomes unbalanced and creates a problem is when we stupid humans muck with it. So the more we kill of something, the more of a problem we are creating in another area. Stop NOW and for goodness sake, and start being caring about our environment and others - including all forms of life.

Glyphosate Petition

			at harvest time, rest assured that it is pulling much needed nutrients from your body. In addition, some very important studies have recently been done that show GM soy plants contain much higher levels of formaldehyde and much lower levels of glutathione than conventional crops. I wonder if this is true for other GM crops. I've also read that Monsanto has known since the 1980s that Glyphosate causes cancer, but hid the scientific evidence away from the public in its "trade secret" -- fortunately, all of these years later, a scientist used the Freedom of Information Act to obtain a copy of that, and now we know. I think that's enough information to turn people to organic food from farmers and manufacturers that they trust. By the way, in the USA, President Obama recently appointed former Monsanto VP Michael Taylor to the position of senior adviser to the commissioner of the FDA. Many U.S. politicians support Monsanto. They are obviously not educated about all of the science that has turned up. Even the World Health Organization has stated that glyphosate is probably carcinogenic. When I called my government representatives, I informed them as best I could of the dangers of GMOs (Round-Up ready crops) and glyphosate. I told them about my family members that have died from cancer and that I am very concerned about the GMO/glyphosate issue and I want them to take immediate action to protect people from the harm done by Monsanto's GMOs and glyphosate.

Chantal Verkerk		South Africa	

Glyphosate Petition

			The inactive ingredient that aids that the glyphosate sticks to the plant does cause cancer but it not listed. Glyphosate kill the life in the soil resulting that the soil itself is then dead and can not sustain life. The plant then to will not grow without the aid of mineral diffident chemical fertilizers. My ignorant neighbour sprayed his entire plot with RoundUp and then set everything alight a week later.
Anthony Kenney			
Erin Gray		South Africa	
Bronwyn			
Mmantsipo Nombungu	Individual	South Africa	Why should we really be exposed to such health risks? Glyphosate must truly fall
Anthony Lamb		UK	glyphosate is not only a carcinogen it also kills all the important organisms in the soil
Eva de Fleuriot	Family	South Africa	
ivan	private	South Africa	Wake up people
Owen Dell		South Africa	
Brett Haley	Jim's Meat and Veg	South Africa	
Patty Hardy		South Africa	Glyphosphate poisons the soil. We need to promote soil health via natural means such as permaculture if we are to sustain food production.
Pippa		South Africa	Tropical Nursery does not, and will not stock herbicides and pesticides. We never recommend their use to customers

Dee Muller	Self	South Africa	We need to stop poisoning the world we need to live in.
Pam Curr	Retired	South Africa	
Bruce Masters		South Africa	Human rights include right to health, right to Consciousness. resistant markers be contributing to antibiotic resistance?
mervyn	Inst of maths	South Africa	Genetically manipulated foods may be one of the most serious threats not only to our environment but to the health and very survival of future generations. Typically, the blame for the promulgation of genetic engineering of our food is placed on chemical companies. But there's actually a hidden back story to how genetically engineered foods were able to reach millions of dinner tables. Steven Druker, who you may not be aware of, is the attorney who filed a lawsuit in the late '90s challenging the most important action the U.S. Food and Drug Administration (FDA) has taken in this area: its presumption that genetically engineered (GE) foods are Generally Recognized as Safe (GRAS) and can enter the market without a shred of safety testing. However, the evidence clearly reveals that the FDA's GRAS presumption was fraudulent when first announced in 1992 and that it remains fraudulent today. Nonetheless, it has played the central role in allowing inadequately tested GE foods to permeate the American market. There are many components to this story, and Steven is just the man to set the story straight. He's written a landmark and historic book Altered Genes, Twisted Truth, with the revealing subtitle: How the Venture to Genetically Engineer Our Food Has Subverted Science, Corrupted Government, and Systematically Deceived the Public. If you have even the remotest interest in this topic, I would strongly encourage you to get a copy of this book. It is, without a doubt, the best book on the topic and provides a treasure trove of facts that will help you decimate anyone who believes that GMOs are safe. Steven was aware of this issue 10 years before I was, and he's really a pioneer and a champion in warning the public and protecting us from the negligence and irresponsible action of the US Food and Drug Administration (FDA).
Cynthia Morrison		South Africa
