ZIINTONI IZICHUMISI ZENDALO?

Izichumisi zendalo zivela kwizinto ezizivelelayo nje apha kwimvelo ezifana nezichumisi zeentsholongwane, umgquba nomgquba wezityalo. Zikhuthaza ukukhula kwezityalo kwaye zongeza impilo yomhlaba ekuhambeni kwexesha ngokukhupha izondlo ezidingwa ngumhlaba.

- **Iintsholongwane zezichumisi** (bio-fertilisers) ziquka umtyekezo weentsholongwa olungele ukukhula kwezityalo.
- **Umgquba (compost)** zizinto ebeziphila zabola – ungangowezityalo okanye owezilwanyana.
- **Umgquba wezityalo** – zizityalo ezikhulisiweyo zaphinda zatyalwa emhlabeni zincedisa ukongeza impilo emhlabeni ngokuthi zikhuphe izondlo ezifunwa zizityalo. Ziphinde zincedise umhlaba ukugcina amanzi.
- **Izichumisi zendalo** ziquka uvubelo lenkunkuma yezilwanyana ezinje ngamathambo, umgquba, ubulongwe obunamanzi nomgquba wentaka.

Ubunintsi bezichumisi zendalo kukuba zifumaneka simahla, emhlabeni wakho kwikhayo lakho nakwimfuyo yakho.
